Search tabs & menus...

Dashboard > Roles

Manage Roles

Create and manage user roles with granular permissions across modules.

[How to create a role?](#) [+ Create New Role](#)

Why use Roles & Permissions?
Group permissions into roles to control which modules and actions users can access. Select a role to review its permissions and keep access consistent for people with similar responsibilities.

3. Select the new role. Choose a module and tick the permissions required for this role.

The screenshot displays the Evenmore Infotech ERP interface. On the left, a dark sidebar contains the navigation menu with categories like Dashboard, CRM, Sales, Purchase, Parties, Inventory, Accounts, HRMS, Reports, and Administration. The 'Roles' option under Administration is highlighted. The main content area is divided into three sections. The first section, 'Search roles...', lists 15 roles: Sales Assistant (SA), Employee (EM), Accountant (AC), BDE (BD), Tele Sales Coordinator (TS), Area Sales Manager (AS), HR Manager (HR), Relationship Manager (RM), Business Operation Executive (BO), and Office Assistant (OA). The 'Sales Assistant' role is selected and highlighted with a blue border. The second section, 'Configure permissions for this role', shows the 'Role Name' as 'Sales Assistant'. The third section, 'Permissions', lists various modules and their associated permissions. The 'CRM' module is selected, and the 'View Lead' permission is highlighted with a blue border. A notification banner at the top right states 'New role "Sales Assistant" created!'. The bottom of the interface shows the user 'Adarsh Gupta' and a pagination bar indicating 'Showing 1 to 10 of 15 roles'.
